

## Specification

### EEX CEGH FM 22 index

(Last updated on: 25 September 2023)

#### 1. General introduction

On the natural gas market, indices (plural) are usually simple measures that reflect the performance of a given contract within a certain time period. Indices usually allow consumers to gain easier access to actual natural gas prices without having to enter the exchange market.

#### 2. Overview

The EEX CEGH FM 22 is a special index developed for the Austrian gas market. It takes into account only trades of the contract in question up to the 22<sup>nd</sup> day of the preceding month. It shows the price evolution of the front month contracts compared to a reference period's price index.

#### 3. Methodology

The index is a percentage value of the current front month contract's price index in comparison to a reference period's price index. This reference period is the delivery month of March 2019 which had a price index of 19,223 EUR/MWh.

The current front month contract's price index is determined on a monthly basis as the arithmetic average of the **Daily Settlement Prices** of the front month EEX CEGH VTP Natural Gas Month Futures contract in question. However, only the trades concluded between the first **Exchange Day** of the month preceding the beginning of the delivery period and 22<sup>nd</sup> calendar day of the same month are taken into account. For example, the August 2022 EEX CEGH VTP Natural Gas Month Futures contract can be traded as of 30 June 2020 however only the trades concluded between 1 July 2022 (including) and 22 July 2022 (including) are taken into account when calculating the EEX CEGH FM 22 index. If the 22<sup>nd</sup> calendar day is not an Exchange Day, the last Exchange Day before the 22<sup>nd</sup> calendar day is taken into account.

Cancelled trades are not considered. EEX reserves the right to exclude individual trades, orders or fair values from pricing if those are not in line with the actual situation on the market.

Daily Settlement Price calculation is explained in the Settlement Pricing Procedure of EEX available on <https://www.eex.com/>, currently under <https://www.eex.com/en/markets/trading-ressources/trading-forms-and-documentation> .

Please note that the term Exchange Day is defined in the Trading Conditions of EEX available on <https://www.eex.com/en/markets/trading-ressources/rules-and-regulations>. Please be aware that the term Exchange Day may differ for different products (spot versus futures).

For further information in relation to the relevant contracts, reference is made to the Contract Specifications of EEX available on <https://www.eex.com/>, currently on the subpage <https://www.eex.com/en/markets/trading-ressources/rules-and-regulations>. All other definitions, denoted with capital first letters, are described in the relevant rules and regulations of EEX.

## 2.1 Index calculation formula

$$\text{EEX CEGH FM 22} = \left[ \frac{\sum_{i=1}^n P_{\text{Settlement}} \div n}{P_{\text{Reference}}} \right] \times 100$$

EEX CEGH FM 22: EEX CEGH FM 22 index denominated in %,

$P_{\text{Settlement}}$ : Daily Settlement Prices of the first front month in EUR/MWh,

$n$ : number of Exchange Days between the first Exchange Day of the month preceding the beginning of the delivery period and 22<sup>nd</sup> calendar day of the same month,

$P_{\text{Reference}}$ : price index of the reference period (March 2019) equal to 19,223 EUR/MWh.

## 2.2 Source data

All data, necessary for index calculation, are provided by EEX solely.

## 2.3 Publication

The index is calculated on the 22<sup>nd</sup> calendar day after the trading period. It is published on a monthly basis, on the 23<sup>rd</sup> day at around 8:00 am CE(S)T by CEGH currently on <https://www.cegh.at/en/exchange-market/market-data/>. On the same site, CEGH furthermore publishes various daily trading data regarding the first front month contract (select Monthly Futures, find First Front Month table).

EEX also published, on its own website (currently <https://www.eex.com/en/market-data/natural-gas>) on a daily basis, the Daily Settlement Prices of various EEX Natural Gas Futures Market contracts including the EEX CEGH VTP Natural Gas Quarter Futures contract.

Historical data is available with subscription to EEX Group DataSource services. For more information, please visit <https://www.eex.com/en/market-data/eex-group-datasource> or reach out to us for guidance (see contacts below under section 5).

## 2.4 Insufficient data

If there are no front month trades concluded on a given Exchange Day, the arithmetic average of the rest of the Exchange Days' first front month contract Daily Settlement Prices are used for calculation.

## 4. References and disclaimers

Central European Gas Hub AG undertakes no liability, representation or warranty as to the accuracy, correctness and/or completeness of this information and shall not be liable for any direct or indirect damages resulting from the use or reliance on this information. Please note that this information is intended for information purpose only and is not a recommendation for trading.
