CEGH GreenGas Platform:

CEGH launched, as one of the first players on the gas market, the CEGH GreenGas Platform in April 2022. It is the first platform to support the decarbonization of the gas markets by providing trading possibilities for Green Gases. It serves as a dedicated marketplace for both **biogas** and **green hydrogen**, bringing together supply and demand in a transparent and efficient way.

If you're interested in how our platform can support your transition to green energy and how you can benefit from it, visit our website: www.cegh.at/en/greengas or go directly to the [CEGH GreenGas Platform](#).

CEGH GreenHydrogen Index:

In **December 2022**, CEGH launched its second major initiative to support the energy transition: the **CEGH GreenHydrogen Index**.

Once again positioning itself as a pioneer in the gas market, CEGH began publishing this index to reflect the **production costs of green hydrogen in Austria**. The index serves as an important **price reference for green hydrogen** – both in Austria and across Central Europe – supporting transparency and market development.

If you're interested in learning more about the different types of green hydrogen and the methodology behind the index, visit our website: [CEGH GreenHydrogen Index Specifications](#) or explore historical and current values directly on the [CEGH GreenHydrogen Index website](#).
